

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

5.1 Conclusions

The conclusion of this research is from analyzing qualitative and quantitative data from interview and student's written text are :

From the result of study researcher found during writing process the student at class XI IPB SMA Negeri 3Langsa still have difficulties in vocabulary mastery, student still confuse to write about sentence structure in english and they are still have difficulties in writing generic structure. The study show that although student can write this kind of text, student still face difficulties in writing this text. Moreover they still face difficult to give relevant idea in thesis and supporting sentence also recommendation. From the data that the researcher found, average score that is 51,5 shown that it's very difficult for students in writing hortatory exposition text.

5.2 Suggestions

The researcher also have some suggestion about students difficulties in writing hortatory exposition text based on this research as follow :

1. Since writing in second language is difficult, teacher expected to develop the materials to make students more interesting in learning and writing process. Especially to make the proggression on student writing skill in hortatory exposition text. Teacher should remind the student about how to organize the content, grammar rules and vocabulary in writing hortatory exposition, so students skill in write this text will be better.
2. This research can be expanded in a wider population.
