

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### 5.1 Conclusions

The conclusions of this research from analyzing the qualitative data, the researcher draw of the students understanding of noun phrase in writing report text. Based on the result of the study presented in chapter IV, the researcher concludes that the students understanding in using noun phrase classified as good is (30%), the students understanding in using noun phrase classified as fair is (10%), the students understanding in using noun phrase classified as poor is (60%) and the students understanding in using noun phrase classified very poor is (0%). They mean the students understanding in using noun phrase in writing report text at the second grade class of SMAN 3 Langsa are generally in poor level.

Even though the students they can use and apply correctly in make a sentence in writing descriptive text, sometimes they have some problems when they make a sentence using noun phrase. They get difficulties in arranging words into a good word order. It is because of their habits of making a sentence in Indonesian first and then translating it into English. They focus on Indonesian structure, for instance, *the match football* which should be *the football match*.

#### 5.2 Suggestion

The researcher also have some suggestion based on this research as follow:

1. For the english teacher, the students still have problem in using of noun phrase, the teacher should give mote attention to them. The teacher should give exercises continuously to their students. It is also important to realize that in constructing English Noun Phrase, the students feel difficult.

2. For the students, the students should learn English harder, especially on the area structure and where they are feel difficult to using noun phrase. it is also important for the student to increase their understanding.
