

## **CHAPTER V CONCLUSION AND SUGGESTION**

### **5.1 Conclusion**

The conclusion of this study, have second points like the research questions, such as:

1. The perception of female teenagers: The Aceh language that is the language that have the cultural meaning for advice all of people from Acehnese. The language that have different word and differend sound, the language that have the specific characteristic from the pronunciation, some word in Acehnese have same word with other language but different meaning of the word. Aceh language that is the language from their parents. Some of them feel Aceh language is difficult for them to following fluently.
2. The factor influence of female teenagers perception toward Aceh language: Because they hear about this before from other, such as: from their families, teachers, friends, cleric. They said all of it from their experiences when hear their friend speak and when parents telling about the Aceh language and when their teachers teach about Aceh language.

## 5.2 Suggestion

Based on the conclusions above, the researcher provides some suggestions here:

1. For the readers, Language is also universal all of language in this world have different words and meaning then the different sound and words. This study discussed about the perception about the language, this study will expected gives an interpretation about the perception of language from all of field.
2. For other researchers, this study expected can give reference in similar aspects to the future study and who want to study about perception, especially about the language and teenagers, they will find this helpful and those who want to compare it from some field with other languages will find what they seek without too much effort.
