

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

Based on a study of students' understanding of writing organization of descriptive text, the researcher wanted to conclude the results and suggestions regarding descriptive text writing in descriptive paragraph written by class VIII.J SMP 1 Langsa.

5.1. Conclusions

The average score of Langsa SMPN 1 students is 81.73 out of 26 students. The highest score on descriptive text writing is 95 totaling 7 students. While the lowest value is between 50-70 which is 4 people. The maximum value obtained in the content aspect is 4, while the minimum value obtained is 2. This shows that more than 50% of students get a good predicate. The maximum value obtained in organizational aspects is 4, while the minimum value obtained is 1. A total of 85% of students get a good predicate, while 15% of students get enough predicates. The

average value obtained by students is 81,73. The value of students' description text writing skills is in a very good category.

The range of values of 50-70 is 4 students with a percentage of 15.38%. While the value of 71-80 was found totaling 10 students with a percentage of 38.46%. The value of 81-90 is 5 students with a percentage of 19.23%. The value of 91-100 was found to be 7 students with a percentage of 26.93%.

5.2. Suggestions

The teacher must explain the stages specifically writing good and correct descriptive text. This will help students to understand and portray imaginatively the descriptive text that will be created. Students will also easily make descriptive texts if they have grammar mastery and good and correct descriptive text writing.
