

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

#### **5.1 Conclusions**

The conclusion of this research from analyze the data obtained through classroom observation, interview, questionnaire and document analysis are :

1. The teacher in SMA N 2 Langsa not really use the principle of language teaching offered by Tomlinson. Tomlinson offered four (4) principles of the language teaching, but the teacher used two of those principles, and the implementation of the principles not clear enough.
2. The teacher did not really concerned the needs of the students during language teaching and learning activity because it might waste the time. But, the language teaching learning process itself set the students as the main focus, which is means the teacher provide the opportunity to the student to be more active.

3. The materials development that is implemented by the teacher also not clear enough. The teacher not really concerned the principles of language teaching when derived the materials development.

## **5.2 Suggestions**

Based on the research, the researcher offered several suggestions as list below:

1. The teacher should know about Tomlinson's principle on language teaching. The principles of language teaching offered by Tomlinson may help the teacher in designing the teaching more.
2. The needs of students on learning should be concerned more. It help the teacher to accomplished the class with the students as the center during the language teaching learning process. Concerning the students' needs help the students understanding the teaching more.
3. Principles of language teaching should be concerned in designing the materials development.
