

CHAPTER V CONCLUSION AND SUGGESTION

5.1 Conclusion

The conclusions of this study have second points like the research questions, such as:

1. English teachers at SMAN 2 Langsa have some active learning strategies on English subject in their classes, there are three points: firstly, before teaching learning process go on, they are starting to asking or converse with the students to know their interest and look at the gesture and mimic of their face, then they give some motivations for their students. From this way the teachers will know what the methods that will use in the teaching learning process at this time. Second, English teachers are using some method that depend with the atmosphere of the class and depend with the student interest. Such as using the method of: grouping, lecturing, role play, questioning, discussion, peer tutoring, and etc. Third, English teachers are choosing some media that relate with the method, such as: Print media such as texts paper, brochures, and etc. Visual media such as: pictures, posters, cartoons and etc. Then the audio visual such as: MP3, tape and etc.

2. The way implementation of the active learning strategies from English teachers at SMAN 2 Langsa that are: when the class already to teaching learning process they introduce the material that will study at that time and teachers explain the material deeply by some examples, teachers are showing the media (picture media) that want to discuss then teachers are suggesting the student to make some group (grouping method) then students do the task (describe about the picture), occasionally teachers survey in all of the group to know how far they have the understanding about the material, students begin to discuss with their friends on the group, then after they are finished the chairman stand on their place then they read the description of the media. After that other students in different group will give some questions and comment. All of the groups have presents their description. When all of group finish teachers give some motivation for their students to increasing their interesting on the next meeting.

5.2 Suggestion

Based on the conclusions above, the researcher provides some suggestions here:

1. For the students, this study discuss about the active learning strategies on English as a foreign language, so they can take this study to reference of their study about the way active learning in the class. With the active learning they can get some benefits that are: they can get the understanding about the material and they can remember some new

vocabulary, because this study explained it's with detail explanation based on the observation in a school.

2. For the readers, the active learning strategies on English as a foreign language is also important to know by a teacher especially for educator, and this study discuss about the active learning strategies on English as a foreign language, so the readers will get more knowledge about the active learning strategies on English as a foreign language and will have some experiences and knowledge about it in a school, this result can be applied in other school next time.
3. For other researchers, this study expected can give reference in similar aspects to the future study and who want to study about the active learning strategies, they will find this helpful and those who want to study about the active learning strategies on all of subject in a school will find what they seek without too much effort.
